

# DANIEL DOMINGUEZ

## JUNIOR MOBILE & FRONT END DEVELOPER | .NET / REACT / REACT NATIVE

Santo Domingo, D.R. (GMT-4, full-day overlap with US Eastern Time) | [danidominguez101@gmail.com](mailto:danidominguez101@gmail.com) | [My Web Portfolio](#) | [linkedin.com/danieldominguezpimentel/](#)

### SUMMARY

Software Engineer with hands-on experience across backend, frontend, and mobile development, currently building production services with .NET 8, ASP.NET Core Web API, and Entity Framework Core that are consumed by React and React Native (Expo) applications. Comfortable moving across the full stack — from API and database design to React/Vue web interfaces and cross-platform mobile apps — and used to translating business requirements into working, tested code with minimal supervision. Regularly uses AI-assisted development tools (GitHub Copilot, Claude) in a human-in-the-loop workflow to ship faster while keeping code quality high. Based in the Dominican Republic, sharing a full working day with US Eastern Time.

### TECHNICAL SKILLS

|                                                                                         |                                                                               |
|-----------------------------------------------------------------------------------------|-------------------------------------------------------------------------------|
| <b>Languages:</b> C#, JavaScript (ES6+), TypeScript, Dart, Java                         | <b>Mobile:</b> React Native, Expo, Flutter (iOS & Android)                    |
| <b>Backend:</b> .NET 8, ASP.NET Core Web API, Entity Framework Core (EF8), RESTful APIs | <b>Databases:</b> SQL Server, PostgreSQL, Firebase                            |
| <b>Frontend:</b> React, Vue.js, Angular, HTML5, CSS3                                    | <b>Cloud &amp; Tools:</b> Azure, Git, CI/CD Pipelines                         |
| <b>Testing:</b> xUnit, Moq, Unit Testing                                                | <b>Other:</b> Figma (wireframes & mockups), AI-assisted dev (Copilot, Claude) |

### PROFESSIONAL EXPERIENCE

| Software Engineer – New Projects   Seguros Reservas                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | Mar 2024 – Present |
